

HEALTH AND SAFETY POLICY

Pace College is committed to:

1. Provide advice on the provision of a healthy and productive work environment for staff and students.
2. Ensure staff has proper wellness programs.
3. Ensure that all departments adhere to safety regulations. The important areas in this policy are as highlighted below:

A. HEALTH EDUCATION

Sound health is the very basis for life. Students can only learn effectively and meaningfully when they are physically, mentally and emotionally healthy. Every effort should be made to promote their well-being. The students should be encouraged to join societies like the Red Cross and St John's Ambulance which will enlighten them on the value of good health.

B. PROVISION OF HEALTH CARE

The school should make provision for basic health care. The school should appoint a member of staff who will be specifically responsible. The members of staff and students may also participate in National cleaning activities liaising with the local municipality authority. The school should provide basic facilities, medicines and materials to cope with emergencies such as injury or illness. There should be a first aid kit in the school. Vendors should not be allowed to sell within the school premises because they can introduce infection and cause filth. The physical surrounds of the school should be kept clean and tidy, for example providing waste bins in all classrooms to ensure that waste is disposed of in good time. The school should also conduct regular inspection to ensure that a high standard of hygiene is maintained e.g. hair and finger nail inspection.

C. SAFETY

Safety of students at school is the authorities' responsibility. It is important to be aware of possible dangers in any situation e.g. in practical lessons for combined science and be equipped to deal with emergencies. Students who go for sporting activities are prone to injuries, a first aid kit should always be at hand.

D. FIRE DRILL

To avert possible fire disaster, fire drills should be conducted regularly to instruct members of staff and students of the real possibility of fire and its disastrous consequences. Firefighting equipment such as fire extinguishers and hoses should be installed.

E. EDUCATIONAL TOURS

It is necessary for our students to undertake educational trips from time to time, in this regard reference should be made to circular P54. Only suitable passenger vehicles should be used to transport pupils. The vehicle should be insured to carry students. All students and staff should always remember the motto: "A healthy mind in a healthy body". This policy will be made available to members of staff. Also possible escape routes should be shown to both students and members of staff.
